Project Overview

The purpose of this report is to provide a comprehensive overview of the veterinary clinic website project. The project aims to design and develop a user-friendly website for a veterinary clinic, providing a platform to showcase the clinic's services, products, and other relevant information.

It will mainly consist of 4 pages:

1. **Home:** This serves as a standard entry point to the website. providing a welcoming message and a quick summarized overview of the clinic and quick links to the other pages. In addition to some reviews (?)

   this page will follow this general shape:

    The top and bottom blue sections are the header + nav section and the footer section which will be shared across all pages

in between there will be different paragraphs. Such as a general introduction to the clinic, and an overview of services and products. Accompanied with appropriate images. Ending this page will be some reviews by previous customers of the clinic.

2. **Products page:** This includes a central section showcasing the different products provided by the clinic, with a side bar on the left to organize these products into different sections or types.

3. **Services:** This is similar to the products page. Instead showcasing different services (Animal care, surgeries etc...). Selecting a specific service takes the user to the appointments page.

   both the **Products** and **Services** pages will share a similar layout

This layout will have the types and categories in a side bar on the left side.

   - Different categories of products in the case of the products page, such as: Cat food, Dog food, Hygiene products etc...
   - Different categories of provided services in the case of the services page, such as: Surgeries, Hygiene care etc...
     The center section will display a list of the products/services in the selected categories alongside with the appropriate information and suitable image for each product/service.

4. **How to find us:** A dedicated page with contact information, an embedded google maps location + address, and clinic hours.

A closer look at the Header+Nav section:

It consists of the name of the clinic displayed ontop of a minimalist Logo background with the nav section located underneath it linking to the other pages.

Note: The colors used in these diagrams are merely to differentiate different elements and do not represent the colors that will be used in the website itself.
